

SOFTWARE DEVELOPER

GOWSHICK H

Passionate software engineer seeking to contribute to a dynamic team by leveraging modern programming languages, frameworks, and design patterns to develop robust, scalable, and efficient software solutions. As a fresher, I bring a solid foundation in HTML, CSS, and JavaScript, along with experience in the MERN stack, databases, Python, Jest, and AWS. Committed to continuous learning and growth in the ever-evolving field of software engineering, I strive to stay updated with the latest industry trends and best practices.

SKILLS

- JavaScript(ES6+) and jQuery
- Python
- Data Structures and Algorithms
- HTML5
- CSS and SASS
- Bootstrap and Tailwind CSS
- ReactJS
- TypeScript
- Responsive Design
- Node.js and Express.js
- MySQL and MongoDB
- AWS Cloud
- Jest
- Git, GitHub

ACHIEVEMENTS

- 1st Place: web hackathon by Codevita Live
- Runner-up: Ideathon by Sri Eshwar College
- Participated in web contests: HackerEarth
- Participated in web hackathon: KumaraGuru College

EDUCATION

2020 - 2024 | CGPA: 8.52

SRI ESHWAR COLLEGE OF ENGINEERING, COIMBATORE

Bachelor's in Computer Science and Business Systems

EXPERIENCE

FULL STACK DEVELOPER INTERNSHIP (MERN)

TNXT India Private Limited, Coimbatore.

Dec 15, 2023 - April 15, 2024

- I joined as a full-stack developer intern and worked on developing e-commerce and logistics solutions.
- I got to learn a lot of things when I got stuck with the problems.
- I had a good experience to developing responsive, good user experience and well functionalized websites.
- I explored, gained valuable insights, and refined my proficiency in development.

CERTIFICATIONS

- **JavaScript Fundamentals** - Guvi
- **Html, Css Beginner to Master** - Udemy
- **MySQL Beginner to Master** - Hacker Rank
- **Modern React with Redux** - Udemy

INTERESTS

- Angular.js, Vue.js, and Next.js

PROJECTS

PROJECT 1 | MY WEATHER APP

DURATION: 2 Week

Technologies: Tailwind CSS, React, TypeScript, Weather and Cities API, Vercel

- This is the weather web app. Having the weather and forecast information of all cities in the world.
- The user can add the cities to their dashboard to continuously monitor the weather details and all.
- This app allows users to easily track a certain area's weather details with a solid user experience and design.

PROJECT 2 | NAYAH FOODS

DURATION: 3 Month

Technologies: Bootstrap, Tailwind CSS, ReactJS, Node.js, Express.js, MongoDB, AWS

- This is the e-commerce website that has minimal products for customers, like grains and powders, with a good, appealing user interface and user experience design that is fully responsive for small screens as well and developed by ReactJS with Bootstrap.
- Implemented secure authentication and mail verification for user signin and order confirmation.
- Secured backend server, APIs developed using express.js, Node.js with MongoDB.

PROJECT 3 | ANYWHERE EYE

DURATION: 2 Month

Technologies: Bootstrap, MUI, ReactJs, Node.js, Express.js, MongoDB

- This is a product stock monitoring web app maintained by the admin and supervisor with different purposes.
- The admin can assign a certain category of products for a supervisor to manage and monitor.
- This web app was developed with a focus on security measures to ensure secure user sessions.

PROJECT 4 | PDF WEB APP

DURATION: 2 Week

Technologies: Bootstrap, ReactJS, React pdf library, Node.js, Express.js, MongoDB

- In this web app, the user can upload pdf files.
- Use the checkboxes to select some desired pages in the order they want to extract them as a new pdf file.
- The export option is given to the user to export a newly selected PDF file.
- Each user can handle their own set of PDF files.
